FIELD STATION E.V.

Field Station e.V. Summer School Summary:
Four Field Stations (student groups) sense Teufelsberg environments, adapt methods, models and media to create a new opensource interactive geo-referenced data model of Teufelsberg housed online and physically at Basecamp.

Schedule:

Registration is now open and ends ~~31.07.16~~ extended till 16.08.16, from then on Field Station reading lists and Teufelsberg maps are made available.

09-16.09, first week: Students live on Teufelsberg to gain input from Field Agents (Theory: site visits, references, presentations & Practice: site analysis, field kits, experiments, prototypes) to sense their local environments. Daily evening events.

Potential sensors: ground penetrating radar, GPS, environmental (solar radiation, air quality, acoustics, noise, wind, pressure, etc), cameras, drones (multicopters with variable sensors, openbouy, etc).

16.09 mid presentation and party
17.09 relaxation

18-23.09, second week: Four Field Stations adapt methods, models and media tuned to their environments and programs (higher resolution sensing) to create specific field stations while contributing their measurements towards a new opensource interactive geo-referenced data model of Teufelsberg located online and physically at Basecamp. Daily evening events.

23.09 Final presentation and party
24.09 Summer School closes

info and online registration

Field Agents:

Basecamp: Carsten Fulland, Hauke Helmer, Christophe Barlieb
Whateverest Workshop: Sebastian Müllauer, Steffen Klaue
Field Stations: Cornelius Meyer, Elisa Limberg, Monica Moses Haller, Sebastian Müllauer, Lidia Gasperoni, Nadine Kuhla von Bergmann, Corneel Cannaearts, Christophe Barlieb, Sebastian Meier, Matthias Böttger, Isabell Schrikel, Holger Prang, Camille Dubois, Hugo Alcocer, Jose Alcocer, Steffen Klaue, Matthias Ballestrem, Katharina Beckmann
Field Kitchen: Katharina Barlieb, Hunter Lee Daniel
Free Field: TBA
